The screenshot shows the GitHub repository page for 'CIS-17A-Fall-2026' by user 'amorales322'. The repository is public and has 1 branch (main) and 0 tags. The commit history shows a single commit 'Hello World Program & README' by amorales322, 1 minute ago, with 2 commits in total. The file list includes 'Class', '.gitignore', 'CMakeLists.txt', 'HelloWorld.cpp', and 'README.md', all committed 1 minute ago. The README file is open, showing the title 'CIS-17A Fall 2026'. On the right, the 'About' section shows 0 stars, 0 watching, and 0 forks. The 'Releases' section shows no releases published. The 'Packages' section shows no packages published. The 'Contributors' section shows 1 contributor: amorales322 (Anthony Morales). The 'Languages' section shows a bar chart with C++ at 90.3% and CMake at 9.7%.

The screenshot shows a C++ code editor with the file 'HelloWorld.cpp' open. The code is a simple 'Hello, World!' program. The code is as follows:

```
1  /*  
2   * File:   main.cpp  
3   * Author: Anthony Morales  
4   * Created on September 6, 2026, 11:09 PM  
5   * Purpose: Intro Lab - Hello World & GitHub  
6   */  
7  
8  // System Libraries  
9  #include <iostream> // Input Output Library  
10 using namespace std;  
11  
12 // User Libraries  
13  
14 // Global Constants not Variables  
15 // Science, Math, Conversions, Dimensions  
16  
17 // Function Prototypes  
18  
19 // Execution begins here at main  
20 int main(int argc, char **argv) {  
21     // Set random number seed  
22  
23     // Declare Variables  
24  
25     // Initialize Variables  
26  
27     // Map/Process the Inputs -> Outputs  
28  
29     // Display Inputs/Outputs  
30     cout << "Hello, World!" << '\n';  
31  
32     // Clean up memory and files  
33  
34     // Exit the Program  
35     return 0;  
36 }  
37
```

The 'Run' output shows the program executed successfully, outputting 'Hello, World!' and 'Process finished with exit code 0'.
